Education

National Institute of Technology, Durgapur

Bachelor of Technology in Computer Science and Engineering

August 2023 – Present

Durgapur, West Bengal

Experience

UTORO Industries Private Limited

April 2026 – June 2026

Full Stack Developer Intern

- Engineered a full-stack fashion e-commerce platform spanning auth, product discovery, cart, checkout, payments, and order/return workflows using **Next.js** and **Node.js**
- Architected a role-based admin dashboard for user, inventory, and order management, replacing manual processes and cutting operational overhead
- Enhanced the storefront UI with **Framer Motion** animations for smoother, more responsive interactions
- Built **Redis** caching for product/search pages, cutting API response times by **60%**, plus Redis-based rate limiting on auth and search endpoints for added security

Projects

NIT Durgapur Placement Portal | *Next.js, React.js, Docker, Nginx, CI/CD*

[Live Demo](#)

- Designed and developed features for a production-grade placement platform serving **3,500+** students, with role-based access for jobs, offers, and document workflows
- Developed the Interview Experience module, allowing students to submit and view verified interview experiences with admin moderation, creating a reliable repository of peer insights for placement preparation
- Optimized frontend performance via dynamic imports, lazy loading, pagination, and memoization
- Dockerized** the app for reproducible deployments and built **GitHub Actions** CI/CD pipelines to auto-deploy the full-stack app (Next.js + Python) via **Docker Compose** across Prod and Demo environments

Ask-Assist | *FastAPI, SQLAlchemy, ChromaDB, Transformers, Streamlit, RAG, Logistic Regression*

[Source Code](#)

- Built an AI-powered campus assistant using **FastAPI** and **Streamlit**, integrating a 3-level hybrid intent classification pipeline for query routing
- Implemented a **RAG** pipeline using **ChromaDB** and Sentence Transformers (**384-dim** vectors) to enable semantic search over institutional PDF documents, reducing hallucination via context-grounded generation
- Designed a SQLite schema with fuzzy entity matching for contact/location lookups, and integrated **Mistral-7B** for response formatting with confidence-based fallback handling

GLUG APP | *Flutter, Firebase Auth, Firestore, Riverpod*

[App Link](#)

- Developed a cross-platform **Flutter** app with a **Firebase** backend enabling **500+** students to track attendance and receive real-time updates on club events
- Created a smart attendance tracker with subject-wise statistics and semester progress monitoring

Open Source Contributions

Coral | *YAML DSL, REST APIs, SQL*

[PR #1057](#)

- Built a **Lemon Squeezy** community data source connector for Coral, an open-source data platform, authoring a **12-table** YAML DSL manifest covering stores, products, orders, subscriptions, discounts, and license keys
- Handled currency minor-unit conversion, partial vs. full refund semantics, and usage-based subscription items to keep query results consistent with Lemon Squeezy's API

Technical Skills

Languages: C++, JavaScript, Python, TypeScript, C, Dart

Front-end: React.js, Next.js, Flutter

Backend: Node.js, Express.js, FastAPI, REST APIs

Databases: Firebase, Supabase, PostgreSQL, MySQL, SQLite, ChromaDB, Redis

AI/ML: RAG, Transformers, Sentence Transformers, Machine Learning Fundamentals

Infrastructure/DevOps: Docker, Docker Compose, Nginx, CI/CD (GitHub Actions), Linux

Developer Tools: VS Code, Git, GitHub, Figma

Achievements

- Recognized as a Top Performer at **AgentHack 2025** organized by WeMakeDevs
- Secured an All India Rank of **7,672** among 1.3M+ candidates in JEE Mains 2023 (Top 0.6%)
- Secured a Rank of **1,352** among 3.2L+ candidates in TS EAMCET 2023 (Top 0.4%)
- Solved **300+** DSA problems on [Codeforces](#) and [CodeChef](#) (2 star, Max: 1412)
